

22. (New Claim) The polyester polymerization catalyst according to claim 11, wherein one or more metals and/or metal compounds selected from the group consisting of alkali metals or compounds thereof and alkaline earth metals or compounds thereof are coexistent therewith.
23. (New Claim) Polyester produced by using a catalyst described in claim 4.
24. (New Claim) Polyester produced by using a catalyst described in claim 6.
25. (New Claim) Polyester produced by using a catalyst described in claim 10.
26. (New Claim) Polyester produced by using a catalyst described in claim 11.
27. (New Claim) Polyester produced by using a catalyst described in claim 12.
28. (New Claim) Polyester produced by using a catalyst described in claim 13.
29. (New Claim) Polyester produced by using a catalyst described in claim 15.
30. (New Claim) Process for producing polyester which comprises using a catalyst described in claim 4 in producing a polyester.
31. (New Claim) Process for producing polyester which comprises using a catalyst described in claim 6 in producing a polyester.

32. (New Claim) Process for producing polyester which comprises using a catalyst described in claim 10 in producing a polyester.

33. (New Claim) Process for producing polyester which comprises using a catalyst described in claim 11 in producing a polyester.

4,

34. (New Claim) Process for producing polyester which comprises using a catalyst described in claim 12 in producing a polyester.

35. (New Claim) Process for producing polyester which comprises using a catalyst described in claim 13 in producing a polyester.

36. (New Claim) Process for producing polyester which comprises using a catalyst described in claim 15 in producing a polyester.
